

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The arguments presented in the Appeal Brief filed 1/14/2010 are persuasive. In particular, the argument that the prior art does not show a security executable in user mode is utilized to create a list of authorized applications in a database on the network ("multi-user system") for the user, with a hook function being attached to **all new applications when the computer user logs onto the network**. The **hook function is used to send a message including the ID for each application**. The system is somewhat interactive in that the list of authorized IDs is automatically queried when the user seeks to initiate an application to determine whether the ID for the application to be initiated is within the list of authorized applications. If so, the security executable "answers" the query by allowing the user to have access to the application. If not, the application to be initiated is terminated, whereby the user is prevented from running the application along with the other limitations of the claim. The closest prior art Winneg et al uses a hook function but does not add the hook function to all new applications or send a message to a security executable module.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devin Almeida whose telephone number is 571-270-1018. The examiner can normally be reached on Monday-Thursday from 7:30 A.M. to.

Art Unit: 2432

5:00 P.M. The examiner can also be reached on alternate Fridays from 7:30 A.M. to 4:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron, can be reached on 571-272-3799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
